SUN CONTROL

Sun Louvre 110 HC and HF

The successful HunterDouglas® 110HC Panel System, made of extruded aluminium preassembled panels in a frame, has now a program extension with new shape fins. The system and has a robust, high-tech appearance

- Fins in between carrier arms
- Slender appearance, height of only 110mm
- Very suitable for round facades
- Choice of H profile (HC) of fin shape (HF)
- Two type of bulk heads: square or bull nose
- Model HF can also be installed vertically

HunterDouglas® 110HC & HF Panel System allows easy and quick installation with very few tools. With relatively small segments the system can be mounted to the façade as a pre-assembled unit.

Larger segments need to be assembled on the building site. Once the steel wall brackets have been fitted to the façade, the support arms must be mounted. The panels and the spacer blocks slide into place between the fitted support arms.

Finally the front of the system must be covered with one of the available fascias. Hunter Douglas offers 2 standard fascia profiles:

- the channel (35 x 115 mm)
- the bull nose (135 x 115 mm)
-

The 110HF panel system can be installed in 2 ways:

- Projected
- Parallel to the facade
